

Eric Zhou

Engineering Lead

eric.zhou0815@gmail.com 0212516286 Christchurch, New Zealand [LinkedIn](#) [GitHub](#)

SUMMARY

Hands-on engineering lead with 7 years delivering production-grade systems across insurance, energy, betting, and enterprise platforms. Combines strong technical depth (TypeScript, C#, Java, React, AWS, Azure) with direct people leadership, technical direction, and delivery ownership. Known for pragmatic, outcomes-focused leadership: identifying bottlenecks early, raising engineering standards, and improving team effectiveness across the full development lifecycle.

EXPERIENCE

Engineering Lead · Jade Software

Jan 2024 - Present

Christchurch, NZ

- Led a team of 4 direct reports with structured 1:1s, goal setting, pair programming, and code reviews; defined team standards cutting PR rework by ~40% and halving new-joiner time-to-first-PR from 2 weeks to 1 week.
- Owned delivery and system architecture for a major Australian insurance onboarding portal using micro-frontend architecture.
- Built secure, scalable customer onboarding portals for a UK finance client using React, .NET, and Azure.
- Led API modernisation for an Australian trading group, replacing legacy text-based integrations with OpenAPI-driven services; introduced AI-assisted workflows cutting repetitive implementation effort by ~80%.
- Architected and delivered the Proof of Funds AI platform, integrating Google Document AI with React and Azure to fully automate document evaluation.
- Pioneered AI practices across the production development lifecycle, embedding AI-assisted tooling into code generation, review, and testing workflows.

Senior Software Engineer · SECTION6

Aug 2021 - Dec 2023

Remote, NZ

- Co-owned engineering hiring pipeline, growing the team by 5 engineers within 12 months.
- Led a timesheet pre-invoicing automation project end-to-end.
- Built a high-throughput data validation service for Vector's energy platform, processing data from millions of meters daily.
- Designed cloud-native solutions using Java, AWS Lambda, DynamoDB, API Gateway, Step Functions, S3, SQS.
- Established CI/CD pipelines using AWS CodeBuild and Terraform.
- Optimised Lambda performance, reducing cold start times by 30% and improving data processing speed by 20%.

Software Engineer · SG Digital

Aug 2019 - Aug 2021

Wellington, NZ

- Developed and maintained high-traffic sports betting systems using React, Node.js, Java.
- Built new betting products and platform features, contributing to significant revenue uplift for TAB NZ.

SKILLS

LANGUAGES

TypeScript C# Java Python

CLOUD

AWS Azure Docker ECS Lambda
API Gateway S3 SQS Step Functions

AI_LLM

OpenAI Google Document AI RAG
Multi-agent Systems Agentic Workflows

FRAMEWORKS

React Next.js Node.js FastAPI .NET
Flask

DEVOPS

CI/CD Terraform AWS CodeBuild
Octopus Deploy GitHub Actions

ARCHITECTURE

System Design Microservices
Event-driven Systems API Design High Availability

PROJECTS

Runnly-ai — User Story to PR Automation Agents System

Autonomous AI engineer integrated into the SDLC, capable of processing full user stories end-to-end.

AI Agents, LLM, Code Generation

- Designed an autonomous AI engineer that explores codebases, plans implementations, writes changes, and opens PRs with minimal human intervention.
- Solved advanced challenges in context-window management and LLM tool use for self-correcting code generation.

Interlify — AI Developer SaaS Platform

AI tooling SaaS platform helping developers integrate APIs with LLMs. Ranked #4 Product of the Day on Product Hunt.

Next.js, TypeScript, Python, OpenAI, Groq, PostgreSQL

- Founder & Architect. Designed, built, and launched from scratch.
- Ranked #4 Product of the Day on Product Hunt.

EDUCATION

Lincoln University

2023-07 - 2024-12

Master of Applied Computing in Computing

Unitec

2018-02 - 2018-12

Graduate Diploma in Computing in Computing

Tongji University

2006-09 - 2010-07

Bachelor of Building Technology and Engineering in Engineering
